Take Your Knitting to the Next Level

Pattern Writing Basics

This course will teach you how to write a quality pattern following a template. Avoid being the cause of frustration and instead, send patterns out into the knitting world with confidence. If you're working on the MKH Program, you'll love having comprehensive pattern knowledge to be able to write patterns to the MHK template more easily. If you're designing, this means less pattern support, as well as less tech editing time, and a better reputation in the industry for your pattern writing skills. You will learn elements of good pattern writing: what information needs to be included and where, the order in which to present it, how to write stitch patterns, and clear instructions. This course does not include knitting.

This course is divided into three lessons. Lesson 1 teaches you the information to be included in a pattern and the order in which it is usually presented. Lesson 2 covers writing directions, charts, and schematics. In Lesson 3, we put it all together to write a full pattern. Lessons are emailed to the instructor who reviews the work.
